

LUPROMAX-DFT

Diesel Fuel Treatment & Cetane Improver

DESCRIPTION

LUPROMAX-DFT is a blend of aliphatic solvents, dispersant and detergents for minimizing the effects of fuel instability and incompatibility.

LUPROMAX-DFT is a amber free flowing liquid developed to dissolve sludge and prevents fuel stratification in fuel tank.

It cleans and keeps the active fuel system clean and reduces black smoke by improving combustion.

APPLICATIONS

- Cetane Improver
- Dissolution of sludge
- Dispersion of asphaltene particles
- Combustion Improver
- Cleaning of fuel system

FEATURES & BENEFITS

- Reduces black smoke
- Dissolves sludge formed during storage
- Disperses existing agglomerates in the fuel as a very fine particles and prevents stratification.
- Prevents blocking of filters and keeps fuel injectors clean
- Prevents asphaltic matter in the fuel from agglomerating and so limits formation of deposits in tank bottoms and transfer lines
- Extends periods between overhauls of injection system
- Improves fuel oil stability
- Reduces unburnt particles
- Does not require elaborate dosing equipment
- Keeps the entire fuel system clean

TYPICAL APPLICATIONS

- Recommended for all diesel engines
- Recommended dosage: 0.05% of diesel volume

NOTE: NOT recommended for use in gasoline engines

PHYSICAL PROPERTIES

Chemical Type : Hydrocarbon blend, special additives
Appearance : Amber transparent liquid
Viscosity : Free flowing
Odor : Bland
Specific Gravity: 0.855
pH : 7
Flash Point : 82°C ASTM D93-90
Pour Point : 9°C ASTM D97-87
Density 15°C : 0.84 ASTM D86-90
Cetane Index : 52 ASTM D976-91

GENERAL INFORMATION

This product is not recommended for use in pure oxygen and/or oxygen rich systems.
For safe handling information on this product, consult the Material Safety Data Sheet, (MSDS).

STORAGE

Products shall be ideally stored in a cool, dry location in unopened containers at a temperature between 8°C and 28°C.

AVAILABLE PACKAGING

25 litres drum
